

# CARROT PATCH

TINYCHEFS

## How do carrots grow?

Here is a simple carrots in the garden craft that can be used as a visual to better understand how these root vegetables grow!

### Supplies:

- 2 paper plates
- light blue and brown paint
- paint brushes
- stapler
- green and orange paper
- glue
- brown grass (optional)

- Paint one paper plate blue and cut the other plate in half and paint brown. The brown one needs to be painted on the back of the plate.
- Once the paint is dry. Staple the two paper plates together to make a pocket.
- Stick brown grass inside the paper plate pocket. This can be made with thin strips of paper.
- Draw a few carrots on the orange construction paper and cut them out. Cut out carrot tops from the green paper and glue them to the back of the carrots... **Place the carrots in the "Dirt"!**
